Recall #: PC786 | PTHFR STP LMP SWTH NTB21-003 Recall Date: 2021 Jan 29

Recall Description

Due to the location of the stop lamp switch on the brake pedal, a chattering condition may occur in the stop lamp relay. Under certain driving conditions, such as frequent stop-and go driving with repeated brake pedal input, the chattering can degrade the relay contact service life.

Remedy

Dealers will inspect the stop lamp switch position and set the gap to required specification. For early model year 2013 affected vehicles (prior to November 9, 2012), dealers will inspect the stop lamp switch position, set gap to required specification, and replace the stop lamp relay with a new one. For late model year 2013 to 2015 vehicles (produced after November 9, 2012, dealers will swap the stop lamp switch on the brake pedal with the Automatic Speed Control Device (ASCD) switch location on the brake pedal and then replace the stop lamp relay with a new one. This free service should take up to one (1) hour to complete but your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact NISSAN or visit [Nissan's website](#).
