**Customer Notes**

During the inspection, Techs scan the vehicle and 5 ECM ( Engine Control Module ) code Showed up.  
 \* 130715 VANOS Solenoid Valve, Inlet: Camshaft Jammed  
 \* 11B014 Electric Fuel Pump, Activation: Short Circuit  
 \* 11A031 Low Pressure Fuel System, Electric Fuel Pump Pressure Too Low  
 \* 11A02 High Pressure Fuel: Pressure Too Low  
 \* 11A036 Low-Pressure Fuel System 2, Electric Fuel Pump Pressure Too Low  
 Regarding the codes, techs diagnosed the fuel pump and clarified that theres a short circuit on the fuel pump..  
  
 First step would be to replace the fuel pump and then focus on the other few codes such as the vanos solenoid, and the high pressure fuel pump. to diagnose the other codes, the car needs to be in a healthy running position.  
  
 Fuel Pump is back order and the eta is 1 month away.  
 Service employees looking around to see if they can find one for sooner.  
  
 The Fuel Pump that is in the vehicle is USED. Due to having no stock on a brand new one in canada customer agreed to use a USED FUEL PUMP.  
 Our recommendation is to buy a new one from the dealership, bring back the vehicle to the shop whenever the part is delivered to us.

The Used Part has 90 days warranty

**Fuel Pump R&R (With Tank Mounted Electronic Fuel Pump) Authorized**
